

Enhanced protection for your equipment can be achieved by installing both the LBK10 Surge Protector and the LBK500 Motorizer. This diagram shows how to install both in series for proper functionality of their protective circuits.

LBK10 & LBK500 Connected in Series

In this diagram:

1. The thermostat signal is connected to the LBK10 "BROWN" wire.
2. LBK10 "GRAY" wire is connected to the LBK500 "THERMOSTAT" terminal.
3. LBK500 "RED" wire then connects to the contactor coil.
